☎ +91-9652032665 ✉ chandrasekhar2782@gmail.com 💼 chandrasekharreddyvuturu 🌐 ChandraSekharReddyVuturu

Profile Summary

Aspiring AI and data science professional with applied experience in machine learning, data analysis, and predictive modeling, including a hands-on internship at Inspire Softech Solutions where a diabetes prediction system was developed. Proficient in Python, SQL, and core ML libraries, with a project track record including an AI-powered chatbot for mental health support. Combines strong technical foundations with problem-solving rigor to deliver scalable, data-driven solutions in artificial intelligence and data science roles.

Skills

Programming Languages: Python, Java, SQL

Web Technologies: HTML, CSS, React

Data Science & Machine Learning: Numpy, Pandas, Matplotlib, Seaborn

Database Management: MySQL, NoSQL

Work Experience

Intern — Inspire Softech Solutions —

Jun 2024–Aug 2025

- Developed a predictive diabetes model using Python and Scikit-learn, applying supervised learning algorithms to healthcare datasets.
- Executed comprehensive data preprocessing and exploratory analysis with Pandas, NumPy, Matplotlib, and Seaborn to inform feature selection.
- Implemented, trained, and evaluated multiple machine learning models, including logistic regression and decision trees, to identify the most accurate classifier.
- Demonstrated proficiency in the end-to-end data science workflow—from data cleaning and visualization to model evaluation and interpretation—on real-world health data.

Projects

Student Mental Illness Chatbot

Oct 2025

- **Engineered** an **AI-powered chatbot** delivering scalable mental health support for students, integrating natural language understanding for symptom detection.
- **Designed** adaptive conversational flows that guide users through emotional assessment and escalate critical cases to human counselors.
- **Implemented** intelligent response logic, connecting students with tailored resources and encouraging early intervention.
- **Technologies:** Python, NLP, AI

Diabetes Prediction Using Machine Learning

Aug 2025

- **Developed** a robust **machine learning model** to predict diabetes risk from clinical attributes (glucose, BMI, age, blood pressure), enabling proactive patient care.
- **Executed** end-to-end data preprocessing, feature selection, and model training, achieving high predictive accuracy with **supervised learning algorithms**.
- **Validated** model performance through cross-validation and hyperparameter tuning, ensuring reliability for clinical decision support.
- **Technologies:** Python, Pandas, NumPy, Scikit-learn

Education

B.Tech in Computer Science and Engineering – Artificial Intelligence

Aug 2023 – Aug 2027

Madanapalle Institute of Technology and Science, Madanapalle

9.06 CGPA

Intermediate (SSE)

June 2021 – May 2023

Sri Chaitanya Jr. College, Kadapa, Andhra Pradesh

93.6%

Achievements & Certifications

- **Smart India Hackathon (SIH) 2025:** Advanced to second round, solving real-world problems in a team-based, high-pressure environment. Demonstrated technical creativity and collaboration.
- **HackerRank Python Badge:** Earned 5 Star rating, reflecting top-tier Python programming skills and consistent competitive practice.
- **Top 1% in IoT Assessment:** Achieved elite ranking, showcasing deep knowledge of Internet of Things architectures and applications.
- **NPTEL Course on Incubation and Entrepreneurship:** Completed with 91% score, building foundational business acumen alongside technical expertise.
- **Certification: C Language Foundation:** Solidified programming fundamentals through Matrix Software Training Institute – essential for embedded and systems-level development.
- **Certification: AWS Cloud Foundations:** Gained practical cloud computing skills from Amazon Web Services, covering core services, security, and pricing.
- **Certification: Data Science for Beginners:** Acquired introductory data science competencies via Board Infinity, including Python libraries, statistical analysis, and data visualization.
